

What is biORACLE?

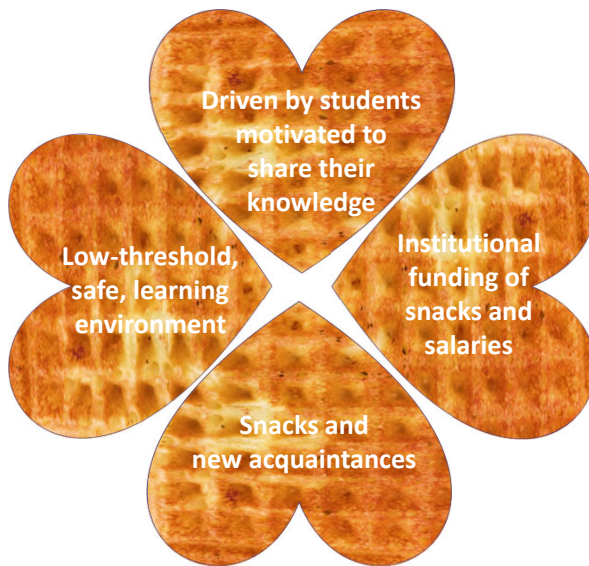

- Student founded bioCEED-project based on students helping students
- Employed graduate students facilitate better learning for undergraduates
- Social arena for students

Story of COVID-19

- Space limitations and digital meetings
- Registration of visitors for potential contact tracing
- Now we are somewhat back to normal

«biORACLE saved my life in BIO101»
- Stian, student
«The oracles helped me a lot by peer reviewing»
- Sondre, student

«I have the impression that I have been able to provide help to many students today, and that feels incredibly good!»
- Jenny Neuhaus (Oracle, 2017)

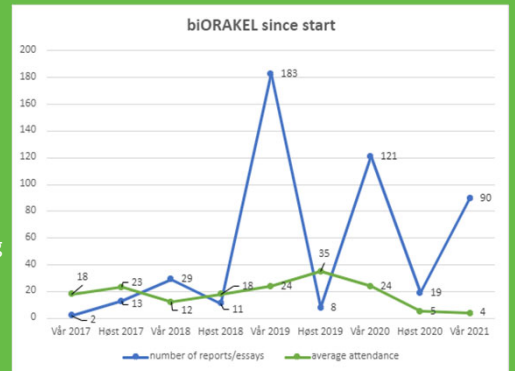

Despite covid, biORACLE is still a success story, here's why:

Students learn better through:

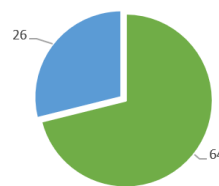

- Discussing curricula in a safe environment
- Knowledge dissemination
- Peer reviewing

- Clear alterations between spring and autumn.
- Attendance is not as appealing when it is digital
- We were struggling to promote when we couldn't meet people.

Distribution between BIO and MOL

■ total reports from BIO ■ total reports from MOL

$$\frac{26 \text{ MOL} - \text{Texts}}{90 \text{ Total} - \text{Texts}} = 28\%$$

$$\frac{92 \text{ MOL} - \text{students}}{337 \text{ students in total}} = 27\%$$
